

April 15, 2016

Dear KraftMaid customer,

Masco Cabinetry is committed to excellence in all aspects of its global activities.

Concern for health, safety and the environment is a principle upon which Masco Cabinetry has built its business. Product stewardship is a key element of the way in which we enact this principle. Stringent product stewardship programs that touch all areas of fabrication, distribution, application technology, and customer service- ensure that we are constantly improving the safety of our products by reducing and wherever possible eliminating raw materials of concern.

In response to your request regarding lead, Masco Cabinetry states that we do not add lead to our products. Test results on randomly selected products confirm that our products currently meet the new standards that are imposed by the Consumer Product Safety Improvement Act of 2008 (CPSIA).

Masco Cabinetry is committed to providing the necessary information to support both its customer and market need, and our internal raw material and formulation review processes will continue to ensure that our products meet the highest standards.

If additional insight or information is required, please feel free to contact us at KraftMaidCares@mascocabinetry.com

Thank you for choosing KraftMaid.

Kind Regards,

Christopher L. Harden, CHMM
Senior Environmental Engineer
