CABINETS: Chanlott | Cherry | Molasses

FEATURE: Chanlott | Maple | Aged Concrete
Let’s get to work on that dream kitchen.

You’re ready for a new kitchen. One that’s designed around your life and has the look that you love. You’re just not sure where to start. Count on KraftMaid Cabinetry to help. Not just with high-quality, hand-crafted cabinets, but with ideas, assistance and 50 years of kitchen know-how to guide you along the way.
Table of Contents
Why KraftMaid®
You want everything to be perfect. So do we.

5-6  Craftsmanship
7-8  Standard features
9-10 Lifetime Limited Warranty

Step 1: Get Ideas
Jump-start your imagination with style and storage ideas for your new space.

13-36 Kitchens

Step 2: Get Ready
Let’s walk through a few things you should know and do before sitting down with a kitchen designer.

39-40 Understanding the process
41-44 Creating a budget
45-48 Prioritize and personalize
49-50 Layout planning
51-54 Working with a designer

Step 3: Get Going
Start bringing your plan together. Explore the KraftMaid® cabinetry options that will make your kitchen everything you’ve ever wanted, inside and out.

59-68 Finish options
69-70 Wood types
71-76 Door styles
77-80 Decorative details
81-88 Kitchen innovations
89-90 Bathroom
91-92 Rest of the house
93-94 What’s next?
Why KraftMaid.

You put a lot of thought into your kitchen, so we put a lot of care into making it. Skilled craftsmen build your kitchen with pride and hands-on attention. Plus, we include a host of standard features designed to stand up to real life and last for a lifetime.
From artisans who have spent years perfecting their specialty finishing techniques to inspectors who carefully examine your cabinets at every step of the assembly, you can count on KraftMaid Cabinetry to deliver consistency, craftsmanship and quality.
With KraftMaid Vantage®, all this comes standard.

DuraKraft™ Plus Finishing System
The first layer of our proprietary topcoat seals in your finish, while a thick, second layer protects from everyday scuffs and stains. Just wipe away the gunk and the worry.

Deep Drawer Boxes with Full-Extension Drawers
Load up on more things. Even oddly shaped utensils and economy-size boxes. Then find what you need with ease because the drawers extend beyond the cabinet face.

90-lb Drawer Slides
Heavy jars? Grandma’s cast-iron grill press? Socket set? No problem. Your drawers will stand up to just about anything you put in them.

Deep Drawer Boxes with Full-Extension Drawers
Load up on more things. Even oddly shaped utensils and economy-size boxes. Then find what you need with ease because the drawers extend beyond the cabinet face.

90-lb Drawer Slides
Heavy jars? Grandma’s cast-iron grill press? Socket set? No problem. Your drawers will stand up to just about anything you put in them.
Solid-Wood Dovetail Drawers
This sturdy joinery is capable of withstanding generations of use. You’ll find it on all four sides of a KraftMaid® drawer.

Soft-Close Drawers and Doors
Keep the peace in a busy kitchen or on a midnight snack run with Whisper Touch® soft-close hinges and slides.

I-Beam Construction
Your cabinets will stay strong, stable and square during delivery, throughout installation and beyond.

3/4” Solid-Wood Frames with Eased Edges
Soft edges reduce the risk of snags and scratches, plus help the wood better hold your choice of finish.

All-Plywood Construction
This strong, stable material holds fasteners and joints tight, and resists swelling and warping from moisture.

Matching Interiors on Glass Doors
Attractive inside and out, the interior of glass door cabinets is finished to match the exterior – a detail that typically costs extra.

See how KraftMaid cabinets get made at kraftmaid.com/craftsmanship.
Built for a lifetime of real living. We promise.

KraftMaid Cabinetry warrants that its cabinets are free of defects in material or workmanship for as long as you own them. If at any point you have questions or need help, just call our Customer Care specialists at 1-888-562-7744.

Visit kraftmaid.com/warranty to read our Lifetime Limited Warranty in its entirety.
## Expect more. We do.

Our higher standard of testing makes certain you won’t be disappointed.

PAINTED CABINETS: Breslin | Maple | Rainfall
STAINED CABINETS: Breslin | Cherry | Weathered Ash Brown
STYLE: TRANSITIONAL

Classic Creativity

Traditional details, like crown molding and furniture-style island legs, pair with a punch of bright blue color and contemporary accents to give this space an eclectic energy. The built-in coffee bar near the breakfast banquette is an eye-opener.
PAINTED CABINETS: Breslin | Maple | Rainfall
STAINED CABINETS: Breslin | Cherry | Weathered Ash Brown
Pedestal Door Cabinet
Bench seating does double duty when there’s easy-access storage below.

Coffee Bar
Enjoy an anytime pick-me-up without the stand-in-line wait.

Empire Corbel
Decorative brackets below countertops or cabinets add visual interest above and beyond the norm.
CABINETS: Marquette | Hickory | Translucent Limestone

ISLAND: Marquette | Maple | Weathered Tavern
STYLE: TRADITIONAL

The New Traditional

A classic kitchen doesn’t have to feel stuffy. Raised panel doors and Roman spindle island legs showcase traditional styling, but open shelving and a unique translucent cabinet finish with a contrasting island balance out the formality.
CABINETS: Marquette | Hickory | Translucent Limestone

ISLAND: Marquette | Maple | Weathered Tavern
Tiered Plastic Storage
With different-sized cubbies, all those different-sized food storage containers will stay better contained.

Oven Cabinet with Deep Bakeware Drawer
Divided drawer storage lines up cookie trays and cake pans by the (baker’s) dozen.

Step Stool Pull-Out
Having a step stool within easy reach puts everything else in the kitchen within easy reach.
STYLE: CONTEMPORARY

Urban Allure

Modern design can still be inviting. Take this kitchen. The cabinets are streamlined and the overall design is minimalist, but the wood-paneled feature wall and guest-friendly touches welcome friends and family into a warm space that’s perfect for hosting get-togethers.
PAINTED CABINETS:
- Hallet
- Maple
- Riverbed Suede

STAINED CABINETS AND WALL PANELS:
- Barnet

Living Room Transition
Expand your kitchen without expanding your kitchen. Decorative glass doors and a paneled refrigerator form an in-between storage wall that’s as useful as it is attractive.

Dining Room
Wall-to-wall bookshelves make for a sophisticated alternative to a buffet table or corner display cabinet.

Integrated Shallow Wine Rack
Attractive wine storage built into the island puts choice vintages in the center of the action.

Auto-Open Top-Hinge Wall Cabinet
One touch opens up overhead storage – no need to dodge a swinging door.
STYLE: RUSTIC

Homegrown Character

Including a sink for rinsing just-picked backyard goodies is a natural in a farmhouse-inspired kitchen. But the real charm comes from blending rustic design elements, like shiplap walls and a furniture-style china hutch, with a more sophisticated cabinet style in both warm white and aged stain finishes.
STAINED CABINETS: Elias | Cherry | Aged Bourbon
Wall Countertop Storage
Extended-height wall cabinet stretches to bring storage down to the counter.

Shiplap Planks
Farmhouse charm and character that you don’t have to tear down a wall to discover.

Herb Station
A second sink near the back door comes in handy for cleaning veggies, flowers and the dirty hands that pick them.

Hutch
The look of antique furniture with the luxury of soft-close doors and drawers.

How do you start designing the ideal kitchen? You already have.

If you’ve been thinking about a new kitchen for a while, you might already have an idea of what it will be like. Or at least you’ve figured out the nagging problems of your current space that you want to fix. Either way, you’ve already taken steps to get the KraftMaid® kitchen you’ll love.

You still have a lot of decisions to make before it all becomes a reality. Don’t worry. We’ve got tools and tips to help you get organized, stay focused and be better prepared to sit down with a kitchen designer to plan your kitchen.
Know what to expect.

How does a kitchen come together? And how soon can you have it? Get familiar with the basic steps you’ll go through to complete your kitchen remodel.

**Plan**

Typical Time Frame: As long as you need

- Gather ideas
- Set a budget
- Take measurements
- Meet with a kitchen designer
- Refine design plans
- Get contractor quotes

**PLAN TIPS:**
Revise and adjust your design plan as many times as it takes. It’s easier and far less expensive to try out ideas on paper than it is to change course after you order materials and begin construction.

**Order**

Typical Time Frame: 4–6 weeks

- Order cabinets
- Purchase fixtures, flooring and appliances
- Box up your dishes
- Set up a temporary kitchen

**ORDER TIPS:**
Your cabinets will take a minimum of 4 weeks to arrive. While you’re waiting, plan ahead for life during construction. What meals can you make with a slow cooker? Where will your kids eat? How will you keep pets safe?
**Construction**

Typical Time Frame: A few days–2 weeks

- Demo
- Plumbing, electric and HVAC rough-in
- Drywall and painting

**CONSTRUCTION TIPS:**
Demolition is dirty and dusty. Protect floors and walls leading to and from your kitchen. Expect surprises and delays in this phase. They’re part of every remodeling project.

---

**Installation**

Typical Time Frame: 4–6 weeks

- Cabinets arrive
- Inspect your order for any shipping damage
- Lay flooring
- Install cabinets
- Measure for countertops
- Install countertops
- Install lighting, faucets, backsplash and hardware
- Complete finish carpentry

**INSTALLATION TIPS:**
Keep a keen eye out for the inevitable scuff or touch-up and note those on a punch list of fixes for your contractor.
The big question: What does a new kitchen cost?

Cost is the most common and often the most uncomfortable question for anyone considering a kitchen remodel. Use this page to help you make sense of the numbers.

Want to try more advanced, interactive budgeting tools? Visit kraftmaid.com/calculators.
Set a ballpark budget.

A common rule of thumb is to invest 15% of your home’s value in your kitchen remodel. Multiply the market value of your home by .15 to calculate this figure.

Keep project scope in mind. Are you happy with how your kitchen works, but want an updated look? Maybe you won’t spend 15%. Expanding into that little-used dining room? You might need to set aside more for that. Consider different percentages that make the most sense for you.

<table>
<thead>
<tr>
<th>YOUR HOME VALUE:</th>
<th>YOUR BALLPARK BUDGET:</th>
</tr>
</thead>
<tbody>
<tr>
<td>$</td>
<td>X .15 = $</td>
</tr>
<tr>
<td></td>
<td>X = $</td>
</tr>
</tbody>
</table>

Work out the cost breakdown.

It’s helpful to understand how much you can expect to spend on each aspect of your project. (Fine-tune subtotals as you see fit. For instance, if you keep your existing appliances, you can use that money for upgrades in a different category.)

Multiply your ballpark budget by the following:

<table>
<thead>
<tr>
<th>Category</th>
<th>Multiplier</th>
<th>$</th>
</tr>
</thead>
<tbody>
<tr>
<td>CABINETS</td>
<td>X .40</td>
<td>$</td>
</tr>
<tr>
<td>COUNTERTOP</td>
<td>X .13</td>
<td>$</td>
</tr>
<tr>
<td>APPLIANCES</td>
<td>X .12</td>
<td>$</td>
</tr>
<tr>
<td>FAUCETS, SINKS AND PLUMBING</td>
<td>X .04</td>
<td>$</td>
</tr>
<tr>
<td>FLOORING</td>
<td>X .04</td>
<td>$</td>
</tr>
<tr>
<td>LIGHTING AND ELECTRICAL</td>
<td>X .04</td>
<td>$</td>
</tr>
<tr>
<td>WALL TREATMENT AND TRIM</td>
<td>X .03</td>
<td>$</td>
</tr>
<tr>
<td>LABOR AND CONTINGENCY (Unexpected Expenses)</td>
<td>X .20</td>
<td>$</td>
</tr>
</tbody>
</table>
Ways to save.

Renovating the kitchen is one of the best ways to improve both the value of your home and the time you spend there. And while your remodeling project may be a significant investment, there are many ways to cut costs without sacrificing your vision.

WHAT’S THE ROI?
Homeowners have recouped up to 62% of their kitchen investment in improved resale value. (Source: Remodeling. 2019 Cost vs. Value Report.)
Keep your layout.
Costs balloon when you add windows, remove walls and relocate plumbing, gas or electric lines. Explore ways to make improvements without significant changes to your existing space.

Look for affordable alternatives.
Ask your kitchen designer about material options that give you the look you want for less:

• Choosing a door with veneer panels rather than a comparable style in solid wood will cut costs without dramatically changing the look of your space.

• You can get the appearance and character of hardwood floors in laminate, engineered hardwood or even tile.

• Design choices don’t have to be all or nothing. For instance, consider budget-friendly butcher block on the perimeter counters, but splurge for quartz on your feature island.

Consider updates in phases.
Maybe your appliances are still in good working order. Make that a future upgrade. Or add the tile backsplash next year. You won’t necessarily reduce your overall costs, but you’ll spread out your expenses over time.

Ship smart.
While it makes sense to have a room full of cabinets delivered directly to your home, you might save money if you have other materials, like fixtures and flooring, shipped to the store for you or your installer to pick up.

Time it right.
Contractors are generally busiest in the summer and the months leading up to the holidays. You may find a better deal on labor if you schedule your work just after the new year.
A kitchen that’s built around you.

The real beauty of a kitchen comes through in how it works. Since everyone uses their kitchen differently, now is the time to think about how you will live in yours. Use this worksheet to help prioritize what matters most to you.

Now that you’ve thought more about how you’ll use your new kitchen, imagine having a space that’s built around the activities you love. A place to share a meal, a drink or an important reminder – KraftMaid Cabinetry and your kitchen designer can make it happen.

**Stacked Cocktail Cabinet**
A well-stocked bar at counter height that can easily be hidden behind closed doors.

Turn the page for more personalized spaces.
**Message Center**

Never again have to ask, “Where are my keys?” or “What time is the softball game?”

**Home Office**

A convenient place to spread out homework or update an online grocery order. Out of the way, but in touch with the action.

**Coffee Station**

Centralize coffee-making activity so it’s easy to get caffeinated when you’re still half asleep.
**Kids’ Drop Zone**
Manage clutter with a designated area for stashing school supplies and backpacks.

**Dining Room**
Think beyond wall art. Showcase your prized china or display mementos from time spent abroad. It makes for interesting dinner conversations.

**Baking Station**
Baking is fun. Putting everything away, not so much. So keep everything handy with the ability to quickly stash it all away once the cake is in the oven.
How to measure your space.

Take basic measurements of your existing kitchen so your kitchen designer can design a floor plan that makes the most sense for your space and your vision.

1. Sketch out an outline of your kitchen. Label each wall with a number or letter for easier reference in future design and planning discussions. Precise scale isn’t important.

2. Mark the general location of any windows, door openings and obstructions like radiators or structural posts.

3. Mark the general location of your sink and range.

4. Grab a tape measure and measure the full width of each wall from corner to corner. Jot down the measurements (in inches) on your drawing.

5. After you’ve measured the overall width, go back and measure the locations of all the openings and obstructions you’ve already marked.
   • Measure windows and doors from the outside edge of the trim on one side to the outside edge of trim on the other. Note the height of each opening as well.
   • Also measure from the nearest wall/corner to the center of each window and door.

6. Locate any utilities, like water supply and drain lines, gas lines, electric outlets and HVAC vents. If you can’t see the gas line behind the range, for example, measure to the center of the range. The gas line will be located nearby.

7. Finally, measure the height of your room. If you have soffits, the part of the ceiling that drops down to meet the top of your wall cabinets, get both floor-to-ceiling and floor-to-soffit measurements.

8. When you’re done with measurements, take pictures of each wall and closer shots detailing any obstructions. This helps your designer visualize the things you’ve noted on your drawing.
A WORD ABOUT ACCURACY.

Your rough measurements are just that, rough. Double-check your numbers and be as specific as you can on your sketch. But be sure to talk to your kitchen designer about getting professional measurements before you place your final order.
Put your plans in motion.

What can you expect when you work with a kitchen designer? Frankly, a lot. Your kitchen designer is a professional who can add value at every step of your project.

Schedule a kitchen design appointment at a local KraftMaid dealer at kraftmaid.com/appointment.
Advice and ideas.
Every day, kitchen designers guide people through this process. They know their way around a kitchen, so they can point out ways to balance your budget with your wish list, improve overall functionality, and help you avoid common (and costly) mistakes. All they need is the chance to get to know you and your needs.

Planning and design services.
You’ll never regret having professional assistance to create your kitchen design plan. Your kitchen designer can map out your entire space down to the last detail – maximizing storage, optimizing work zones and adding finishing touches to make the style statement you’re seeking.

Product selection.
Your kitchen designer knows KraftMaid® cabinetry inside and out. So they’re the perfect resource to identify the door styles, finish options and storage innovations that will combine to become your dream kitchen.

Bringing your plan to life.
Don’t just imagine what your new space will look like. Your kitchen designer can show you a 3D rendering of your plan – complete with your chosen door style and finish option.

Confidence.
Working with a design professional takes guesswork out of placing an order. Your kitchen designer knows the kind of details, like toe kicks, fillers and end panels, you’ll need to include to make your final installation complete.
Checklist: Seven things to do before you meet with a kitchen designer.
1. Gather ideas.
Help your kitchen designer better understand your vision by collecting photos that inspire you and sharing your priority worksheet results from page 45.

2. Consider what’s changing. (And what’s not.)
You’re not committing to anything just yet. But go in with an idea of your preferred layout and any appliance upgrades you’d like.

3. Snap pics of your existing kitchen.
Images allow your kitchen designer to get a better sense of your space. So take several from multiple angles.

4. Get rough measurements.
Bring a sketch of your space to begin discussions about possible design plans. Find measuring tips on pages 49-50.

5. Establish a ballpark budget.
Be prepared to have an upfront conversation about numbers. Use the ballpark budget calculator on page 42 for assistance.

6. Define your target timeline.
Tell your kitchen designer if you’re trying to complete your project by a certain date or event.

7. Make an appointment.
Schedule time to have an initial conversation about your project with a kitchen designer.

Get Going

A kitchen that’s you, down to the last detail.

What’s the most exciting part about designing a new kitchen? Putting your personality into it.

From colors and door styles to organizational solutions and decorative details, you’ll find plenty of ways to customize your design. Every option is inspired by real people and what they want in a kitchen, whether it’s a style trend or a specific storage feature.

So let’s dive in and find the right combination to make your space one-of-a-kind and one hundred percent you.
Let’s talk style.

There are three primary factors that drive the overall appearance of your kitchen:

**Finish Options**

PAINTS | STAINS | SPECIALTY FINISHES | FOILS

The finish you select will likely have the biggest influence on the look of your space. Find the perfect choice (or choices) to dress up your space, starting on the next page.

**Wood Types**

Choosing a type of wood goes hand-in-hand with choosing a finish. Each species has different characteristics that your finish choice will accentuate (or disguise). Learn more about each wood option on page 69.

**Door Styles**

Smooth slab doors make for a sleek, contemporary look. Ornate raised panel doors fit traditional designs. Versatile Shaker-style doors can fit any kitchen in between. Turn to page 71 to see the entire lineup.
Wood Types

Door Styles

Finish Options
Colorful consistency.

Whether you choose an airy white or go dark for drama, every painted cabinet offers consistent color and a clean, tailored appearance. The uniformity comes from completely covering the wood in several coats of durable enamel.

All paints are available with a standard or Suede topcoat.

Finish Techniques

Add beauty, depth and character by adding a specialty technique. View samples of paints in every available technique at kraftmaid.com/paint-upgrades.

Available technique options:

- CI = Cinder Highlight
- SA = Sable Highlight
- CO = Cocoa Highlight
- SU = Suede Topcoat
- V = Vintage Technique
- D = Distressed Technique

COLORMATCH™

Got a different color in mind? With ColorMatch™, you can order KraftMaid Vantage® cabinets to match an extensive selection of Behr®, Benjamin Moore®, Sherwin-Williams® or Valspar® paint colors. Ask your designer for details.

Need a closer look? Order a sample.

Visit kraftmaid.com/samples to order a chip or door. Sample cost is eligible for a rebate when you place your full kitchen order. (See website for details.)
Finish Techniques

**Vintage Paint**
Hand-distressing and sanding allow a little of the natural wood to show through the corners and edges. This, combined with a matte Suede topcoat, gives your cabinets a unique, timeworn appearance.

**Paints with Highlight**
Artisans apply highlight by hand to enhance visual depth and interest in the corners, crevices and ridges of each door style.

**Paints with Suede Topcoat**
A Suede topcoat softens the tone of the paint with a matte finish. Like our standard topcoat, it provides durability and resistance to scuffs, stains, UV fade and cleaning chemicals.

**KraftMaid Vantage® Exclusive Distressed Paint**
Distressing gives a kitchen the appearance of reclaimed painted wood by adding deliberate distressing, such as wormholes, rasped edges and oversanded corners that expose little patches of the original wood. A Suede topcoat is standard.

---

**Stains**

**Natural**

**Honey Spice**

**Fawn**

**Praline**

**Barley**

**Ginger**

**Husk**

**Sunset**

**Cognac**

**Chesnut**

**Chocolate**

**Baltic**
Natural beauty and character.

Our hand-applied and hand-rubbed stains add tints and effects that highlight unique grain patterns and subtle variations in every individual board. It’s the perfect choice for highlighting the unique characteristics of each cabinet.

All stains are available with a standard or Suede topcoat.

Available technique options:

- S = Suede Topcoat
- D = Distressed Technique
- SA = Sable Glaze
- O = Onyx Glaze
- E = Ebony Glaze

All stains are shown on Maple unless marked otherwise.

* Shown on Cherry  ** Shown on Oak

Finish Techniques

Add beauty, depth and character by adding a specialty technique. View samples of stains in every available technique at kraftmaid.com/stain-upgrades.

Need a closer look? Order a sample.

Visit kraftmaid.com/samples to order a chip or door. Sample cost is eligible for a rebate when you place your full kitchen order. (See website for details.)
Looking for something a little more unique? Consider a specialty finish for beauty that’s out of the ordinary.

**Finish Techniques**

**Distressed Stain**
Distressing mimics the imperfections of reclaimed wood by adding wormholes, softened corners, rasped edges and other deliberate methods of loosening the sense of uniformity – all done by hand. A Suede topcoat is standard.

**Stains with Glaze**
We add depth and dimension to the finish by flooding your stained door with glaze, then hand-wiping so glaze remains in crevices and grain lines.

**Stains with Suede Topcoat**
A Suede topcoat softens the color tone of the stain with a matte finish. Like our standard topcoat, it provides durability and resistance to scuffs, stains, UV fade and cleaning chemicals.
Translucent Finish
Color without concealing the character.
Get the color and brightness of paint while enhancing the natural beauty of wood like a stain. This hybrid finish allows just enough of the grain to come through.

Distressed technique shown on Maple.
Weathered Finish
A timeworn appearance.

By using a dry brush technique to hand apply a finish on top of a base paint or stain, KraftMaid Cabinetry artisans create the look of wood that has been exposed to the elements for years. No two doors or drawers will be exactly the same.
**Aged Finish**  
The look of heirloom furniture.

Skilled artisans selectively sand, distress and burnish your cabinets to create the antique character of a kitchen that has served generations of families. Hand application of these techniques produces a random, inconsistent appearance that makes every door unique.
An alternative that’s easy to love.

By using heat and pressure to fuse a solid-color foil to your cabinet doors, you can get a flawless, uniform and fade-resistant finish that can even take a light scrubbing. (Foils stand up well to humidity too, making them a smart choice for your mudroom, laundry and bath.)

If you’re thinking modern, smooth high-gloss or textured wood-grain foils bring a contemporary, high-design feel to any kitchen.

Wood Types

The overall look of your cabinets comes from both the finish you choose and the type of wood it goes on. Stains and translucent finishes will influence the appearance of wood’s naturally occurring color variations and grain patterns.

**Alder**
- Ranges from pale pink-brown to tan
- Features knotholes, burls and mineral streaks

Available only in Rustic.

**Hickory**
- Dramatic color contrasts from light cream to dark reddish-brown
- Random grain pattern with burls and knots

**Cherry**
- Reddish-brown hues that mellow (darken) over time
- Smooth, straight-grain pattern

**Oak**
- Light to medium brown
- Richly textured, wavy grain pattern

**Maple**
- Off-white with light, creamy hues of gold
- Consistent, fine grain with occasional dark mineral streaks

**Rustic**
- Naturally occurring knots, burls, wormholes and color variations from mineral streaks can make wood even more interesting

Rustic option is available on Alder, Hickory and Maple on select door styles.
EverCore®

Extra-smooth, extra-solid doors and drawer fronts, made by super-compressing wood fibers, react less to temperature and humidity than milled wood and provide an especially stable surface for a painted finish. Available on a variety of door styles.

Set the tone for your kitchen.

Each door option has unique characteristics that can give your kitchen a specific style. (We’ve arranged our doors from simple to ornate so it’s easier to focus in on a look you might like. Your kitchen designer can help you find the right one for your design and your budget.) Wandering which styles are most popular? Turn the page to see a few of our best sellers.
Popular Door Styles
As you narrow in on a door style for your project, it may be inspiring to see some styles that are trending or perennial favorites.

Shaker
It’s a style term given to specific door styles that provide a clean, orderly and simple look.

Marquette
An ogee profile gives the raised center panel of Marquette a handsome, time-honored appearance.

Avery
This solid slab door is as streamlined and contemporary as you can get.

Lyndale
Versatile. Classic. Clean-lined. What’s not to love about this quintessential Shaker style?

Some terms you’re likely to hear.

**Shaker**
A style term given to specific door styles that provide a clean, orderly and simple look.

**Slab**
A door with the look of a single piece of wood with no panel or decoration. Drawer fronts are also available as slab on many styles.

**Recessed Panel**
A recessed panel style has a flat panel set back inside the frame of a door.

**Raised Panel**
A raised panel door has a panel that rises in the center and is somewhat decorative.

**Full Overlay**
A full overlay has very little cabinet frame showing around each door and drawer front, creating a seamless look.

**Half Overlay**
A half overlay shows some cabinet frame around each door and drawer front.

**Drawer fronts**
Are also available as slab on many styles.
Durango*
The wider frame pairs with a wide reveal on the beveled center panel to update a classic.

Putnam*
A wider frame and a solid wood center panel amp up the luxury in this Shaker-inspired door.

Brookfield*
A beaded panel door looks great in a cottage or coastal setting. Glazes or highlights can accentuate the narrow grooves.

* shown with optional drawer front
Decorative Door Options

Highlight a cabinet run or make a place to showcase special keepsakes. See the complete offering of decorative door options at kraftmaid.com/decorative-doors.
Specialty Inserts
From textured glass to useful chalkboard, inserts give you the artistic freedom to make a style statement in your kitchen.

Aluminum Frames
Coupled with your choice of glass inserts, brushed aluminum frames add a touch of sparkle right where you want to attract attention.
For such a relatively small item, your choice of hardware can dramatically change how the room feels: the choice of the metal, the size of the pull, and the style of the knob. See our full offering at kraftmaid.com/hardware.

1. NEW Brexler Knob
2. NEW Keene Pull and Knob (Satin Nickel)
3. NEW Callister (Statuary Bronze)
4. NEW Bordeaux Pull
5. NEW Sloan Pull
6. NEW Galileo Pull (Statuary Bronze)
7. NEW Belhaven Knob
8. NEW Quantum Pull
9. NEW Resolute Pull
10. NEW Suitcase Pull (Chrome)
11. NEW Forged Pull and Knobs
Lighting & Molding

Lighting and molding can accent what you want people to notice and help hide the pipes, ducts, wiring and uneven surfaces you don’t want them to see.

1. Large Empire Corbel
2. Shiplap
3. Under Cabinet Lighting
4. Above Cabinet Molding
5. In-Cabinet Lighting
6. Decorative End Panel
Kitchen Innovations

Of course, you’ll love the look of your new kitchen. But you might love what you don’t see even more. We’ve designed a place for everything – from step stools to coffee pods to phone chargers. You’ll find plenty of clever ideas to make your kitchen work better for you.
Pull-outs are the most efficient use of limited space. They slide out to create reachable storage throughout the full depth of the cabinet, so even items at the back stay easily accessible.

1. Cleaning Supplies Pull-Out
2. Utensil Pull-Out
3. Tray Pull-Out
4. Pantry Pull-Out with Utensil Storage
5. Pantry Pull-Out
6. Wall Filler Pull-Out

Corner Solutions

Every kitchen’s inevitable corners take up so much space and, without the right solutions, turn into “where seldom-used items go to hide.” The right innovation lets you store things like appliances or baking ingredients — and makes them easy to find and retrieve.

1. Easy Reach Chrome Super Susan
2. Easy Reach Wood Super Susan
3. Corner Drawer Cabinet
4. Blind Corner with Wood Lazy Susan
5. Blind Corner with Wood Swing-Out
6. Wall Angle Chrome Lazy Susan
7. Blind Corner with Chrome Swing-Out
Wastebasket Solutions

Trash is literally the last thing you want people to notice. Put the trash, recycling and compost behind closed doors and out of the way.

1. Base Top-Mount Wastebasket with Four Baskets
2. Sink Base Wastebasket
3. Slim Wastebasket
4. Top-Mount Wastebasket
5. Top-Mount Double Wastebasket
6. Bottom-Mount Double Wastebasket with Auto-Open

Spice Storage

Everyone has a cabinet or drawer they rummage through looking for the spice they need, but that’s the last thing you want to do as the chicken burns and the water boils over. Keeping spices organized and within arm’s reach of the stove makes cooking a little more seamless.

1. Spice Shelf
2. Spice Caddy
3. Door Spice Rack
4. Tiered Storage Shelf
5. Spice Drawer
Engineering and technology come together in the kitchen. So now, for example, Auto-Open cabinets open with a button-push, and messy cords hide in charging drawers.

1. Auto-Open Wall Top Hinge Cabinet
2. Auto-Open Bi-Fold Cabinet
3. Charging Drawer
4. Mixer Shelf

Bring everything into view from the back of any cabinet. Now the spring form pan, the baking mixes and all those one-use appliances won’t get ignored simply because they’re hard to get to.

1. OXO® Canister Roll-Out Tray
2. Roll-Out Tray Divider
3. Utility Cabinet with Deluxe Roll-Out Trays
4. Chrome Deluxe Roll-Out Tray
5. Sink Base Roll-Out Tray
**Pantry Storage**

Maximize usable storage and bring gratifying organization to spaces that tend to get chaotic. Imagine: a kitchen world where everything has a place and nothing is abandoned in the back of the cabinet.

1. Wood Door Storage
2. Wall Appliance Garage
3. Tall Pantry Roll-Out
4. Multi-Storage Pantry with Adjustable Shelves
5. Wall Multi-Storage Pantry

**Smarter Drawers**

You know it’s in there somewhere but you just can’t seem to find it. When the pot is boiling or the bus is coming, you don’t have time to search. Eliminate the jumbled, jammed-up messes (and the frustration) and grab what you need the moment you need it.

1. Tiered Plasticware Storage
2. Rubbermaid® Container Drawer
3. Pull-Out Table
4. Toe Kick Drawer
5. Multi-Size Deep Drawer Organizer
6. Deep Drawer Organizer
7. K-Cup® Organizer Drawer
Utensils

Corral forks, knives, cheese graters, measuring spoons, the set of corn cob holders shaped like corn, the slightly less whimsical corn cob holders, and anything else that has a shape, size, length, width or one-of-a-kind use that makes it apt to cause trouble in a drawer.

1. Tiered Combination Drawer
2. Angled Utensil Drawer Organizer
3. Tiered Drawer Storage
4. Cutlery Drawer
5. Knife Section Cutting Center

Pots & Pans

Avoid an unwelcome game of “Find the Right Pan.” No more rattling metal. No more misplaced lids. No more uncomfortable crouching as you attempt to retrieve the stock pot.

1. Oven Cabinet with Deep Bakeware Drawer Dividers
2. Adjustable Drawer Dividers
3. Cooking Center
4. Tiered Pan and Lid Storage Pull-Out
5. Pots and Pans Organizer
6. Pegged Drawer Organizer
Beyond Cooking Storage

A lot more than cooking happens in the kitchen, and that’s natural, but food prep and other projects shouldn’t compete for space. These solutions give non-cooking items a home, so they can stay in the kitchen without taking over.

1  Integrated Shallow Wine Storage
2  Base Wine Storage
3  Angled Drawer Organizer
4  Supply Caddy
5  Message Center
6  Utility Cleaning Cabinet
7  6’ Base Step Stool Pull-Out
8  File Cabinet Base
Beautiful style outside, lasting protection inside. Protect your cabinets from minor spills and leaks under the sink with the CoreGuard® Sink Base. Made of an engineered polymer that resists damage and stains, the CoreGuard Sink Base is built to last and easy to clean so it stays beautiful for as long as you own it.

1  CoreGuard® Sink Base
2  CoreGuard® Deep Sink Base

Design Solutions
Accents and statement pieces – some simply complement (or complete) the style you have going. Others manage to be stylish and useful too, whether it’s a strategically placed floating shelf for handy wine glasses, or a way to make the island more welcoming.

1  NEW Walk-In Pantry Corner
2  Shiplap Planks
3  Recessed Panel Wall Hood
4  Transitional Island End
5  Tapered Leg Island End
6  Sterling Floating Shelves
7  Bookcase Island End
Bathroom

Why stop at the kitchen? You can create a bath that meets your unique style and storage needs, too. KraftMaid Cabinetry and your kitchen designer will make it easy.
